

Introducing
HARMONY

31 colours

Durable beauty

Distinguished by its outstanding durability and simple beauty, Harmony is the quintessence of underplayed elegance.

Harmony is an exclusive upholstery fabric made from pure New Zealand wool in a two-coloured satin weave. Made from super-fine wool yarns, Harmony has a beautiful matte finish and an exquisite delicate look which stands in striking contrast to the fabric's superior strength and durability.

Beauty lies in the details

At first sight, the fabric appears to be a true solid colour, but close-up it reveals itself to have more dimension and depth. Light and shadow fluctuate across the surface, and as the dark underlying colour stands out, the fabric's surface comes to life.

Tougher than the rest

With a rating of 200,000 Martindale, Harmony is extremely durable and suitable for upholstery of all types of furniture and all kinds of interiors. The ultra-resilient fabric is made to withstand even extreme wear and tear and is designed for 24/7 use in high traffic areas such as airports, educational institutions and hotels.

Coloured by nature

Harmony is available in 31 beautiful shades inspired by the colours of stones and minerals. The colour scale offers a multitude of blues and greens as well as a varied selection of warm, glowing autumn reds and oranges. Greys in all shades and trending hues like delicate rose and deep violet are also available.

Denim decor

While the palette's many shades of grey are inspired by classic men's wear fashion, the many blue colours offer a distinct blue jean look and the opportunity to create contemporary denim decor and furniture.

- Multi-functional with a comprehensive colour palette
- 200,000 Martindale with superior abrasion resistance
- Delicate & matte finish – made from pure New Zealand wool
- Oeko-Tex certified & EU Ecolabel
