

HUSH™

Creates decorative effects

Good reasons for choosing

HUSH™

- Unique screen textile
- Soft colour palette
- Sophisticated melange effect
- Can be combined with the unicoloured fabric Stay
- Environmentally friendly – Oeko-Tex certified

HUSH™ – DISCRETE ELEGANCE

Hush was conceived, designed and produced with inspiration from historical wallpapers which impart a beautiful and decorative effect to the interior while softening the rooms and giving them style and personality.

Hush – enveloped in a light mist

A blend of white and coloured fibres creates the soft Hush's colour structure and envelopes the fabric in a light and blurred mist which almost reaches out to its surroundings. Hush is the perfect fabric for screens as, with its sophisticated melange effect, it's easily integrated and it leaves a friendly and accommodating impression.

Colours to soften the room

Hush's palette offers 20 colours with a touch of white, which softens the entire palette so that even the dark nuances appear light and inviting. With a colour card ranging from cold to warm nuances over delicate mint to rust, Hush is ideal for combinations over and above the usual with both uni- and multi-coloured fabrics.

Hush is related to the clearer Stay, and if the two screen fabrics are combined, the arrangement exudes mood, atmosphere and personality.

Hush is an environmentally friendly fabric which carries the Oeko-Tex label.
