

STAY™

in a contemporary
setting

Good reasons for choosing

STAY™

- Screen fabric
- Clear and pure colour palette
- Evocative colour effect
- Soft and accommodating

STAY™ – A PHENOMENAL ENRICHMENT

Fabrics on walls have been used throughout the history of style in both private and public interior. With its softness and pure colour palette, Stay was designed to embellish rooms, screening and vertical surfaces which are intended to be vibrant and inspiring while moderating noise and creating environment and intimacy.

Surfaces can be toned up and down

Stay's colours are pure and clear in their expression, so screens can easily be toned up or down – made darker or lighter. The solid coloured fabrics complement each other and form fine combinations with patterned, multi-coloured and mixed fabrics.

With its matted texture and 20 colours, Stay was designed to be able to enrich and create unique and individual atmospheres on its own, but also in combination with its heathered partner Hush.

Stay carries both the Oeko-Tex label and the EU Ecolabel.
