

# Congratulations on your new furniture with Comfort+

## Comfort+

Comfort+ is extremely versatile and durable. It is anti-static and fire-resistant; stains are removed with ease; it is machine washable and can even be disinfected with ethanol! Moreover, it is environmentally-friendly, dimensionally stable, breathable and soft – and retains its appearance year after year. Properties that make Comfort+ an All-terrain fabric.

## 10 year guarantee

Comfort+ has an unsurpassed stability and ability to stretch. This means that wrinkles are avoided – even after longterm use. Comfort+ is the market's best microfibre material and it does not pill (fluff). We therefore give you a 10 year guarantee against pilling and wearing through in normal use.

## Easy to maintain

The backside of Comfort+ features antistatic fibres, and is also water and oil-repellent and resistant to dirt and stains. We recommend gentle vacuum cleaning as needed with a soft mouthpiece to preserve the fabric's attractive colour and appearance.

## Washing

Comfort+ can be machine-washed at up to 74°C. Max. shrinkage is 2%.

Please note that stitching, zippers etc. can be washed. Hang dry or tumble dry at low temperature. Comfort+ may be disinfected with ethanol.

## Spot removal

A golden rule

- Always remove the spot as quickly as possible. Most types of spot can be removed with lukewarm water, possibly with an added neutral detergent.
- Do not soak the entire piece of furniture.
- Use only the cleaning methods specified in the guide to spots.
- Always use a clean white cotton cloth and use only small quantities of cleaning agent at a time.
- Warning! Benzene, acetone and similar products may dissolve the underlying padding if used excessively

# Stain guide

---

## **Ballpoint pen and cosmetics**

Clean with methylated spirit.

## **Blood**

Wash off with cold water. If this does not help, add a neutral detergent.

## **Candle wax**

Iron over absorbent paper (be careful that the polyester doesn't melt at excessive temperature). Clean with turpentine. Dab with lukewarm water containing a neutral detergent. Alternative: see chewing gum.

## **Chewing gum**

Cool with ice blocks in a plastic bag or frozen item. Scrape away. Any remaining gum can be carefully removed with benzene.

## **Chocolate, grease and sweets**

Wash with lukewarm water containing a neutral detergent.

## **Coffee, tea and milk**

Remove as much as possible with blotting paper. Wash with water containing a neutral detergent.

## **Grass and vegetables**

Wash with lukewarm water, possibly containing a neutral detergent.

## **Ink**

Remove as much as possible with blotting paper. Clean with 20% methylated spirit. Then wash with water containing a neutral detergent.

## **Jam, syrup, fruit and juice**

Remove as much as possible with a spoon, then wash with lukewarm water containing a neutral detergent.

## **Nail polish**

Dab with nail polish remover. Use acetone if the spot does not disappear.

## **Oil**

Sprinkle talcum on the spot and allow it to work. Brush it away and carefully dab with a cloth moistened with benzene or methylated spirit.

## **Paint**

Oil-based: clean with turpentine and dab with water containing a neutral detergent. Water-based: wash with cold water containing a neutral detergent. Ask an expert if the spot is old.

## **Shoe polish**

Carefully dab with a cloth moistened with benzene or methylated spirit.

## **Urine**

One part colourless vinegar mixed with two parts of water. Use a dry cloth as an underlay when the spot is soaked. Remove the diluted vinegar with alternate dry and wet cloths.

## **Wine and spirits**

Remove as much as possible with blotting paper. Wash with water containing a neutral detergent and clean with thinned methylated spirit.
